

ValoTerra

BY MONOSEM

THE NEW BENCH MARK OF PLANTING

ValoTerra is the next generation of **electric drive** row unit. Planting is an investment and a crucial step in helping crops reach their full potential... ValoTerra improves emergence and increased productivity. The new row unit brings precision agriculture that is effective, yet simple, and accessible.

The 56V architecture guarantees the multiplicity of motors thanks to a power generator capable of supplying almost 7.2 KW. This capacity opens the possibility of Ultra Precision Agriculture, with variable rate, curve compensation, row-by-row shutoff, and much more. This new 56V supports intelligence at the heart of the meter.
